

CRISPER

Because of their high water content, most vegetables require more moist storage conditions to preserve their crispness. This is especially true of the green and leafy variety and those which tend to wilt when they are served raw. Therefore, the Crisper is the ideal storage place for them.

Wash and trim all greenable parts of such vegetables as asparagus, broccoli, cauliflower, green beans, leaf lettuce, Brussels sprouts and tomato. Drain them, with the water which clings to the lightest green Crisper. If they are slightly wilted, they will become crisp once again.

Cook and wash cornucopia and potatoes and preserve them in cooking or serving before putting them in the Crisper.

Wash tomatoes, mushrooms, green and red peppers, green and wax beans, cucumbers and asparagus. You need not wash peas in the pod or corn on the cob first.

Wash, trim and drain leafy vegetables like lettuce, collards, chard, spinach and celery. You may want to store the celery first in water or spunkies.

Cook and wash green beans and peas. Wrap them in waxed paper and put them in the Crisper. Wrap cut dry cutlets in waxed paper, too, before storing them in the Crisper.

Store root vegetables like beets, white turnips, rutabagas, parsnips, and carrots in the Crisper. First, wash them well, remove the tops and ends.

You may also store in the Crisper leeks, asparagus, artichokes, and other fruits or vegetables and other fruits such as apples and pears, which have a thin protective covering.

You may prepare asparagus, leafy greens and other leafy greens in advance, wrap them in waxed paper and store them in the Crisper where they will stay fresh and moist.

VEGETABLE BIN

In the line of all Kenmore Refrigerators, except Model C21-F, there is a convenient, moist Vegetable Bin for the storage of dry vegetables which do not require refrigeration. These include potatoes, dry beans, squash and rutabagas.

TEMPERATURE CONTROL

The Temperature Control regulates the degree of cold both in the food storage compartments and in the Refrigerator Freezer. As soon as you plug the refrigerator into the outlet, it begins to operate. To stop the operation without disconnecting the refrigerator, turn the Temperature Control to "OFF".

FOR NORMAL USE set the control at the Number 1 position, which is at the top end of the dial.

FOR A WARMER SETTING turn the control to the left, or counter-clockwise. A warmer setting is advisable when there is less food to keep, when the refrigerator is not used a great deal and the door is not opened frequently, when the refrigerator is in a cool kitchen or
