Life Sciences Question Papers And Memos Ieb:

International Science Between the World Wars N. L. Krementsov, 2005 This book addresses the function of international science through a detailed study of international congresses in genetics held from 1899-1939 *Catalogue of the General Assembly Library of New Zealand* New Zealand. Parliament. Library, General Assembly Library, 1897

American Egyptologist Jeffrey Abt, 2012-05-01 James Henry Breasted 1865-1935 had a career that epitomizes our popular image of the archaeologist: Daring, handsome and charismatic, he traveled on expeditions to remote and politically unstable corners of the Middle East, helped identify the tomb of King Tut and was on the cover of Time magazine. But Breasted was more than an Indiana Jones; he was an accomplished scholar, academic entrepreneur and talented author who brought ancient history to life not just for students but for such notables as Teddy Roosevelt and Sigmund Freud. In *American Egyptologist*, Jeffrey Abt weaves together the disparate strands of Breasted's life from his small town origins following the Civil War to his evolution into the father of American Egyptology and the founder of the Oriental Institute in the early years of the University of Chicago. Abt explores the scholarly, philanthropic, diplomatic and religious contexts of his ideas and projects, providing insight into the origins of America's most prominent center for Near Eastern archaeology. An illuminating portrait of the nearly forgotten man who demystified ancient Egypt for the general public, *American Egyptologist* restores James Henry Breasted to the world and puts forward a brilliant case for his place as one of the most important scholars of modern times. **The Law Times**, 1867 **The Illustrated London News**, 1868 *South African national bibliography*, 1998 Classified list with author and title index The Writers Directory, 1976 **General Catalogue of Printed Books to 1955** British Museum. Dept. of Printed Books, 1967 *With and Without Galton* N. L. Krementsov, 2018 In 1865 British polymath Francis Galton published his initial thoughts about the scientific field that would become eugenics. The same year Russian physician Vasilii Florinskii addressed similar issues in a sizeable treatise entitled *Human Perfection and Degeneration*. Initially unheralded, Florinskii's book would go on to have a remarkable afterlife in twentieth and twenty-first century Russia. In this lucid and insightful work, Nikolai Krementsov argues that the concept of eugenics brings together ideas, values, practices and fears energised by a focus on the future. It has proven so seductive to different groups over time because it provides a way to grapple with fundamental existential questions of human nature and destiny. *With and Without Galton* develops this argument by tracing the life story of Florinskii's monograph from its uncelebrated arrival amid the Russian empire's Great Reforms to its reissue after the Bolshevik Revolution, its decline under Stalinism and its subsequent resurgence first as a founding document of medical genetics and most recently as a manifesto for nationalists and racial purists. Krementsov's meticulously researched biography of a book sheds light not only on the peculiar fate of eugenics in Russia but also on its convoluted transnational history, elucidating the field's protean nature and its continuing and contested appeal to diverse audiences, multiple local trajectories and global trends. It is required reading for historians of eugenics.
