Rogerson, 2015-07-01 This volume contains the papers presented at the International Conference on Mathematics Education in a Connected World held from September 16 21 2015 in Catania Italy The Conference was organized by The Mathematics Education for the Future Project an international educational project founded in 1986

**Learning as Development** Daniel A. Wagner, 2017-10-04 Learning is the foundation of the human experience It begins at birth and never stops a continuous and malleable link across life stages of human development Disparities in learning access and outcomes around the world have deep consequences for income social mobility health and well being For international development practitioners faced with today s unprecedented environmental and geopolitical pressures learning should be viewed as a touchstone and target for those seeking to truly effect global change This book traces the path of international development work from its pre colonial origins to the emergence of economics as the dominant discipline in the field and lays out a new agenda for policymakers researchers and practitioners from early education through adulthood Learning as Development is an attempt to rethink international education in a changing world

**Navigating the Pedagogical Space for Knowledge Building Classrooms** Seng Chee Tan, 2022-11-01 Showcasing the design and implementation of knowledge building pedagogy this book for educators and education researchers illuminates this future oriented instructional and learning approach In this Knowledge Age innovation and creative knowledge works are central to the progress of a society increasing the productivity

of knowledge workers remains the main priority of competitive societies. Consequently, developing knowledge building capacity among students becomes one main goal of education. Knowledge building aims to transform school education in a radical way by developing the culture of innovation and knowledge creation in classrooms from preschools to universities. Knowledge building pedagogy focuses on sustaining idea improvement among students who develop the collective cognitive responsibility to add value to the learning community. Developed since the 1990s, knowledge building is now a model of instruction researched and advanced with an international network of researchers, teachers, educators, engineers, and policymakers. Implementing the knowledge building approach requires educators to make decisions based on principles rather than following prescriptive procedures that characterized most instructional models. Tan highlights the key pedagogical principles and discusses the critical design considerations. He also identifies the emerging research directions and developmental works related to knowledge building. A must-read book for educators and education researchers who are interested in the design and implementation of knowledge building pedagogy. **Liberating Learning** Santiago Rincón-Gallardo, 2019-03-05. This book is about three complementary ideas: 1. learning is a practice of freedom; 2. liberating learning in public education requires widespread cultural change in classrooms, schools, and entire education systems; and 3. social movements have been the most powerful vehicles for widespread cultural change, and in their logic of operation lie the keys to liberate learning. Drawing on existing knowledge and new research on educational change, the author offers nine principles of action to liberate learning in schools and across entire educational systems. Topics discussed include learning pedagogy, leadership, education policy, widespread cultural change, collective action, and whole system improvement. Written for educators and leaders interested in transforming teaching and learning in classrooms and schools, as well as for public intellectuals and people interested in widespread pedagogical change, the book articulates a new way to think about and pursue educational change. *Minerals Yearbook*, 2011. **Weapons of War: Environmental Impact**, 2013-08-15. The Indian Air Force, from a humble beginning in 1932 with 4 Wapiti aircraft, six Indian officers, and 22 Hawaï sepoy, has traversed a long journey of eighty-one years and crossed noteworthy milestones to become the fourth largest air force in the world. While facing several limitations, challenges, IAF have met all the national defence requirements and made several strategic contributions. With growing economic interests and national aspirations expanding interests well beyond our territorial boundaries and prevailing internal security challenges, India's national defence requirements are also increasing. The first Gulf War was a monumental turning point in the war-time employment of aerospace power. Ever since, the significance of aerospace power in war, crisis, and peace time has been gaining ascendancy. Kosovo and Libya are the two pertinent examples of the allies virtually relying on aerospace power without committing any soldiers on the ground. Scrutiny of the emerging global and national trends suggests that employment of the aerospace assets, as well as the nation's expectation from the IAF, will continue to rise. Alongside, there is an unplanned fall in flying platforms, weapon systems, and pilot strength of the

IAF This study is an attempt to analyse the history of the IAF in war as well as other than war operations to appreciate the emerging trends in geopolitics aerospace technology and doctrine and to identify the likely challenges IAF would be facing in the next two decades and beyond Road map for transformation of the national security framework indigenous aerospace industry and the IAF has also been suggested

**Military Weapons and Environment** Wing Commander (Dr) Umesh Chandra Jha, 2017-10-15 Armed conflicts have become more complicated with the emphasis shifting towards new weapons such as drones cybercrime and autonomous weapons In July 2017 the UN General Assembly adopted the Treaty on the Prohibition of Nuclear Weapons This treaty prohibits a full range of nuclear weapon related activities such as undertaking to develop test produce manufacture acquire possess or stockpile nuclear weapons or other nuclear explosive devices as well as the use or threat of use of these weapons The ongoing conflicts have shown that the consequences of the use of explosive weapons are not limited to death physical injury and disability but also include long term impacts on mental well being The use of improvised weapons by States and non State actors is an area of concern for the environment Every State must therefore ensure that weapons used by their armed forces are explicitly adjudged under International Humanitarian Law IHL and Human Rights Law While reviewing a new weapon the States must adopt multilateral approaches drawing upon relevant legal health environmental and military expertise This book describes the environmental effects of eight weapons and explosive remnants of war that have caused extensive environmental harm in the recent past It also makes specific recommendations addressed to the international community and the States for protecting the natural environment from the impact of weapons of war This book will contribute towards a better understanding of the environmental harm caused by military weapons
