N6 Quantity Surveying At Tshwane University:

Real Estate Finance and Economics Lucy Ogbenjuwa, 2023-01-23 Finance is essential to the real estate project development sector's success. However, there is still an enormous gap in the real estate sector. What seems to be required is a model that could guide managers in securing real estate project development finance. Findings have shown that no comprehensive framework is presently available. This book presents a toolkit to support real estate managers in securing real estate project development finance. The book will help managers to understand the different financing options and criteria required by financiers. The study includes case studies from developed and emerging economies including Germany, the United Kingdom, the United States of America, China, Nigeria, and South Africa. The author concludes that the dominant challenges common to managers in both economies are access to land collateral and rising interest rates. *Development and Investment in Infrastructure in Developing Countries: A 10-Year Reflection* Innocent Musonda, Erastus

Mwanaumo, Adetayo Onososen, Retsepile Kalaoane, 2024-12-20 Development and Investment in Infrastructure in Developing Countries: A 10 Year Reflection includes the contributions to the 10th International Conference on Development and Investment in Infrastructure DII 2024 Livingstone Zambia 24-26 July 2024. The papers discuss, evaluate, and devise ways of maximising the benefits of infrastructure development and achieve outputs that will inform policy and wider development goals. This Open Access book is invaluable to leaders, researchers, practitioners, and stakeholders involved or interested in infrastructure development in developing countries. **The Construction Industry in the Fourth Industrial Revolution**

Clinton Aigbavboa, Wellington Thwala, 2019-08-09 This book gathers papers from the 11th Construction Industry Development Board CIDB Postgraduate Research Conference held on 28-30 July 2019 in Johannesburg, South Africa. The conference provided an essential forum for reviewing and generating knowledge on Construction 4.0 and consequently highlighted processes and practices that allow us to deliver and operate built environment assets more effectively and efficiently by focusing on physical to digital and digital to physical transformation. The event addressed three broad themes: Industrial production, prefabrication, 3D printing and assembly offsite, and advanced manufacturing. Cyber-physical systems, actuators, sensors, IoT, robots, and cobots for repetitive and dangerous tasks, and drones for mapping, progress monitoring, safety, and quality inspections, lifting, moving, and positioning, and Technologies: digital ecosystems, digital platforms, BIM, video, and laser scanning, AI, and cloud computing, big data, and data analytics, reality capture, blockchain, simulation, virtual and augmented reality, data standards, and interoperability and vertical and horizontal integration. Given its scope, the book will be of interest to all construction industry and architectural professionals who want to learn about cutting-edge technologies applied to construction. **Locally Relevant ICT Research** Kirstin Krauss, Marita Turpin, Filistea Naude, 2019-01-17 This

book constitutes the refereed proceedings of the 10th International Development Informatics Association Conference IDIA 2018 held in Tshwane, South Africa, in August 2018. The 20 revised full papers presented were carefully reviewed and selected.

Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic

papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8

September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the

contributions made by researchers at the conference and are considered the written record of the work that was presented to

fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the

studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the

qualitative approach adopted made use of the interview method to collect data On the other hand studies that were

objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were

some academic papers which used mixed methodology because of the nature of the study Whatever methodology used

adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come

from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from

one contribution to the next However it is interesting to note that in the area of economic performance it was evident that

real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to

human capital development papers presented evidence that there exists a definite need to explore the phenomenon of

personal branding as limited scientific academic research has been done within the field of personal branding or on elements

of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on

organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies

for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new

strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an

organisation With regard to technology and big data impact on organisational performance it was evident that system

performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies

to improve organisational performance Most of the articles contribution reemphasised technology education and training as a

means of digitising business and improving effectiveness Target audience The target readership is academic researchers and

business leaders who require access to the latest developments in the fields of economics information management business

education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment
