Kula, Jochen Zeller, 2025 This volume brings together leading scholars from the African continent and beyond to provide a detailed account of the languages of the Bantu family The book will be an essential resource for students and researchers specializing in the Bantu languages and for typologists and comparative linguists more broadly Building the Foundation: Whole Numbers in the Primary Grades Maria G. Bartolini Bussi, Xu Hua Sun, 2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level Accordingly a focus area that is central to the discussion was chosen together with a number of related questions The broad area of Whole Number Arithmetic WNA including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula The study of this core content area is often regarded as foundational for later mathematics learning However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country to country As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well as an opportunity to learn from the practices of different countries and contexts The Smithsonian Institution African Mammal Project (1961-1972) African Mammal Project (Smithsonian Institution), David F. Schmidt, 2008 Conceived and directed by Henry W Setzer the African Mammal Project 1961 1972

covered portions of 20 countries concentrated in the northern western and southern regions of Africa and generated over 63 000 specimens of mammals. The geographic foundation of this ambitious field program is documented as an annotated gazetteer that provides coordinate data for 785 cardinal collecting localities, collectors' names and dates of collection, general ecological descriptions and mammalian genera obtained at each site. In georeferencing localities, emphasis was given to primary archival sources: original specimen labels, collectors' field journals and contemporaneous field maps. Most localities surveyed fell within the Northern Savanna and Southern Savanna biotic zones. The Mediterranean Sahara Desert, Guinea High Forest and Southwest Arid zones were moderately sampled; the Southwest Cape and Afrotropical zones were minimally represented. The principal inventory method applied by field teams involved multiple transect lines of snap traps supplemented by hunting roost searching, mist netting and specimen purchasing. Total collecting effort varied immensely among countries, from 13 days in Chad to 770 days in South Africa, and the number of specimens obtained was strongly correlated with length of dedicated site inventory, mostly ranging from 3 to 8 days of collecting effort per cardinal locality. The resulting 63 213 vouchers include examples of 15 orders, 47 families and 208 genera of African mammals. Rodentia (705) and Chiroptera (20%) are most abundantly represented. The historical genesis of the African Mammal Project and its scientific goals, as developed by H. W. Setzer, are reviewed in the introduction to the gazetteer.

Dictionary Unit for South African English, 1996. A Dictionary of South African English is the fullest ever study of the English language in South Africa. The result of 25 years of work, this dictionary has been researched and written according to historical principles. However, as well as recording examples of South African English going back to the sixteenth century, the dictionary also provides an insight into the dramatic political and cultural changes in South Africa's history by examining the country's ever-changing language right up to the present day. Research into language has involved the contributions of hundreds of individual South Africans as well as extensive research into all other forms of the written and spoken language. Diverse and informative entries include robot, a traffic light bakkie, a small truck, bond, a mortgage and brinjals, aubergines. The dictionary includes such areas as children's slang, the vocabulary of soldiers, the mines, local music, terms, the townships, food and a detailed look at the complex language of apartheid. English words originating from all the country's groups are recorded, including words from Dutch, Afrikaans, the Malay, Indonesian languages, the Indian, Khoisan, Nguni and Sotho languages.
