Early Years Pedagogy in Practice Ruksana Beigi,2020-07-20 This accessible text encourages readers to understand and confidently engage with distinctive early years pedagogy It shows how pedagogy not only underpins the early years curriculum but is also inherent in the role of

the adult and the experiences that are offered to young children The book explains what the differing early years pedagogies are why they are encouraged and the knowledge skills and practice that are required to work with them Emphasising that what works in one situation may not in another and a wider pedagogical knowledge is essential to ensure quality outcomes for children it considers key topics such as the role of the pedagogue and developing your own style promoting a lifelong love of learning in children under your care sensitivity and inclusion for all children s cultures and communities promoting the rights of every child under your care Incorporating reflection points and research tasks to support independent learning this is essential reading for students on Early Childhood Studies courses and Early Years Foundation Degrees as well as early years practitioners

The Importance of Being Little Erika Christakis, 2017-02-07 Christakis expertly weaves academic research personal experience and anecdotal evidence into her book a bracing and convincing case that early education has reached a point of crisis her book is a rare thing a serious work of research that also happens to be well written and personal engaging and important Washington Post What kids need from grown ups but aren t getting an impassioned plea for educators and parents to put down the worksheets and flash cards ditch the tired craft projects yes you Thanksgiving Handprint Turkey and exotic vocabulary lessons and double down on one simple word play NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child s eye view of the learning environment To a four year old watching bulldozers at a construction site or chasing butterflies in flight the world is awash with promise Little children come into the world hardwired to learn in virtually any setting and about any matter Yet in today s preschool and kindergarten classrooms learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child s intelligence while overtaxing the child s growing brain These mismatched expectations wreak havoc on the family parents fear that if they choose the wrong program their child won t get into the right college But Yale early childhood expert Erika Christakis says our fears are wildly misplaced Our anxiety about preparing and safeguarding our children s future seems to have reached a fever pitch at a time when ironically science gives us more certainty than ever before that young children are exceptionally strong thinkers In her pathbreaking book Christakis explains what it s like to be a young child in America today in a world designed by and for adults where we have confused schooling with learning She offers real life solutions to real life issues with nuance and direction that takes us far beyond the usual prescriptions for fewer tests more play She looks at children s use of language their artistic expressions the way their imaginations grow and how they build deep emotional bonds to stretch the boundaries of their small worlds Rather than clutter their worlds with more and more stuff sometimes the wisest course for us is to learn how to get out of their way Christakis s message is energizing and reassuring young children are inherently powerful and they and their parents will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners This bold and

pragmatic challenge to the conventional wisdom peels back the mystery of childhood revealing a place that is rich with possibility *Technology and Innovation in Learning, Teaching and Education* Arsénio Reis, José P.
