Narratologies David Herman,1999 **Basic Elements of Narrative** David Herman,2011-09-13 Basic Elements of Narrative outlines a way of thinking about what narrative is and how to identify its basic elements across various media introducing key concepts developed by previous theorists and contributing original ideas to the growing body of scholarship on stories Includes an overview of recent developments in narrative scholarship Provides an accessible introduction to key concepts in the field Views narrative as a cognitive structure type of text and resource for interpersonal communication Uses examples from literature face to face interaction graphic novels and film to explore the core features of narrative Includes a glossary of key terms full bibliography and comprehensive index Appropriate for multiple audiences including students non specialists and experts in the field *Handbook of Narrative Analysis* Luc Herman,Bart Vervaeck,2019-12 Stories are everywhere from fiction across media to politics and personal identity Handbook of Narrative Analysis sorts out both traditional and recent narrative theories providing the necessary skills to interpret any story In addition to discussing classical theorists such as Gerard Genette Mieke Bal and Seymour Chatman Handbook of Narrative Analysis presents precursors such as E M Forster related theorists Franz Stanzel Dorrit Cohn and a large variety of postclassical critics Among the latter particular attention is paid to rhetorical cognitive and cultural approaches intermediality storyworlds gender theory and natural and unnatural narratology Not content to consider theory as an end in itself Luc Herman and Bart Vervaeck use two short stories and a graphic narrative by contemporary authors as touchstones to illustrate each approach to narrative In doing so they illuminate the practical implications of theoretical preferences and the ideological leanings underlying them Marginal glosses guide the reader through discussions of theoretical issues and an extensive bibliography points readers to the most current publications in the field Written in an accessible style this handbook combines a comprehensive treatment of its subject with a user friendly format appropriate for specialists and nonspecialists alike Handbook of Narrative Analysis is the go to book for understanding and interpreting narrative This new edition revises and extends the first edition to describe and apply the last fifteen years of cutting edge scholarship in the field of narrative theory

Narratives at the Beginning of the 3rd Millennium Jessica Homberg-Schramm,Anna Rasokat,Felicitas Schweiker,2016-12-14 This volume offers a cross disciplinary approach to narratives in the 21st century in response to the growing scholarly concern with the decreasing explanatory capacity of theoretical concepts and narrative configurations originating in postmodernism The essays collected here meet this conceptual gap by offering cutting edge research from a variety of disciplines such as literary studies and design and media studies as well as social sciences all of which employ narrative models to explore the distinctive patterns which shape contemporary conceptions of the 3rd millennium

Anatomies of the Gospels and Beyond ,2019-01-28 Anatomies of the Gospels and Beyond is an edited volume structured around essays that focus on one of the four canonical Gospels and Acts and or theoretical issues involved in

literary readings of New Testament narrative The volume is intended to honor the legacy of R Alan Culpepper Emeritus Professor and Former Dean at Mercer University s McAfee School of Theology The title of the volume which alludes to the title of Culpepper s ground breaking monograph Anatomy of the Fourth Gospel and the breadth of the essays are apt reflections of his research interests over his academic career of over forty years The twenty five contributors are internationally recognized experts in New Testament studies thus the essays represent a snapshot of current research

Time and Uncertainty Paul Andre Harris, Michael Crawford, 2004-01-01 The essays in this volume all originated at the 2001 conference of the International Society for the Study of Time The theme Time and Uncertainty sounds redundant but the contributions try to come to terms with the irreducible openness of time and the impermanence of life The essays from various disciplines have been grouped around fracture and rupture grappling with time and uncertainty as a breach and rapture and structure solving uncertainty into pattern Analyzing Digital Fiction Alice Bell, Astrid Ensslin, Hans

Rustad, 2013-12-17 Written for and read on a computer screen digital fiction pursues its verbal discursive and conceptual complexity through the digital medium It is fiction whose structure form and meaning are dictated by the digital context in which it is produced and requires analytical approaches that are sensitive to its status as a digital artifact Analyzing Digital Fiction offers a collection of pioneering analyses based on replicable methodological frameworks Chapters include analyses of hypertext fiction Flash fiction Twitter fiction and videogames with approaches taken from narratology stylistics semiotics and ludology Essays propose ways in which digital environments can expand challenge and test the limits of literary theories which have until recently predominantly been based on models and analyses of print texts The Routledge Handbook of Translation History Christopher Rundle, 2021-09-30 The Routledge Handbook of Translation History presents the first

comprehensive state of the art overview of this multi faceted disciplinary area and serves both as an introduction to carrying out research into translation and interpreting history and as a key point of reference for some of its main theoretical and methodological issues interdisciplinary approaches and research themes The Handbook brings together 30 eminent international scholars from a wide range of disciplinary backgrounds offering examples of the most innovative research while representing a wide range of approaches themes and cultural contexts The Handbook is divided into four sections the first looks at some key methodological and theoretical approaches the second examines some of the key research areas that have developed an interdisciplinary dialogue with translation history the third looks at translation history from the perspective of specific cultural and religious perspectives and the fourth offers a selection of case studies on some of the key topics to have emerged in translation and interpreting history over the past 20 years This Handbook is an indispensable resource for students and researchers of translation and interpreting history translation theory and related areas Story Logic David Herman, 2002-01-01 Featuring a major synthesis and critique of interdisciplinary narrative theory Story Logic marks a watershed moment in the study of narrative David Herman argues that narrative is simultaneously a cognitive style a

discourse genre and a resource for writing Because stories are strategies that help humans make sense of their world narratives not only have a logic but also are a logic in their own right providing an irreplaceable resource for structuring and comprehending experience Story Logic brings together and pointedly examines key concepts of narrative in literary criticism linguistics and cognitive science supplementing them with a battery of additional concepts that enable many different kinds of narratives to be analyzed and understood By thoroughly tracing and synthesizing the development of different strands of narrative theory and provocatively critiquing what narratives are and how they work Story Logic provides a powerful interpretive tool kit that broadens the applicability of narrative theory to more complex forms of stories however and wherever they appear Story Logic offers a fresh and incisive way to appreciate more fully the power and significance of narratives

Victorian Contagion Chung-jen Chen, 2019-08-29 Victorian Contagion Risk and Social Control in the Victorian Literary Imagination examines the literary and cultural production of contagion in the Victorian era and the way that production participated in a moral economy of surveillance and control In this book I attempt to make sense of how the discursive practice of contagion governed the interactions and correlations between medical science literary creation and cultural imagination Victorians dealt with the menace of contagion by theorizing a working motto in claiming the goodness and godliness in cleanliness which was theorized realized and radicalized both through practice and imagination The Victorian discourse around cleanliness and contagion including all its treatments and preventions developed into a culture of medicalization a perception of surveillance a politics of health an economy of morality and a way of thinking This book is an attempt to understand the literary and cultural elements which contributed to fear and anticipation of contagion and to explain why and how these elements still matter to us today

Postclassical Narratology Jan Alber, Monika Fludernik, 2010 In this volume an international group of contributors presents new perspectives on narrative Using David Herman's 1999 definition of postclassical narratology from *Narratologies New Perspectives on Narrative Analysis* OSUP as their launching point these eleven essayists explore the various ways in which new approaches overlap and interrelate to form new ways of understanding narrative texts Postclassical narratology has reached a new phase of consolidation but also continued diversification This collection therefore discriminates between what one could call a critical but frame abiding and a more radical frame transcending or frame shattering handling of the structuralist paradigm Postclassical Narratology Approaches and Analyses discusses a large variety of different aspects of narrative such as extensions of classical narratology new generic applications autobiography oral narratives poetry painting and film the history of narratology the issue of fictionality the role of cognition and questions of authorship and authority as well as thematic matters related to ethics gender and queering Additionally it uses a wide spectrum of critical approaches including feminism psychoanalysis media studies the rhetorical theory of narrative unnatural narratology and cognitive studies In this manner the essays manage to produce new

insights into many key issues in narratology The contributors also demonstrate that narratologists nowadays see the object of their research as more variegated than was the case twenty years ago they resort to a number of different methods in combination when approaching a problem and they tend to ground their analyses in a rich contextual framework *Journal of Narrative Theory* ,2006 **New Perspectives on Narrative Perspective** Willie van Peer, Seymour Chatman, 2001-03-22

Narrative perspective is the faculty through which humans understand structure and explore the world that confronts them This is the first volume to bring together the theoretical study of perspective with the rigor of experimental studies combining work in narratology with that in linguistics philosophy film studies literary theory and cognitive psychology The chapters are grouped thematically and drawn together by the editors who provide guidance through this new and fascinating interdisciplinary territory *Narratologies* David Herman, 1999 *The Literary Mind* Jürgen Schläeger, 2008 *Literature and Beyond* Eric de Haard, Wim Honselaar, Jenny Stelleman, 2008 **Monatshefte** ,2009 **Malay Literature** ,2010

Avatars of Story Marie-Laure Ryan, 2006 Since its inception narratology has developed primarily as an investigation of literary narrative fiction By grappling with semiotic media other than language and technology other than print the text reveals how digital media convey meaning and create stories
