Financial Aid and Loans for Students Crash Course IntroBooks,2019-12-21 Different schools have different policies regarding how they offer financial aids to students A student seeking financial aid from any particular institution will therefore do well to stay abreast of information about that particular institution and its regulations regarding financial aid Each of these schools has different aims regarding how much of student financial needs they are willing to meet While some schools like Columbia University intend to meet 100% of the students needs financially some other schools go less Grants are given to students without repayment The amount of grant varies based on the level of education and also the complexity of the study work or project In the case of New York University for example grants provided only meet 68% of the student s needs this means the student

may experience budget gap This same school gives most of its aids to its students in the form of loans which the student is expected to pay back after graduation Some conditions also determine how much of the student's needs the school can meet A student with solid academic performance for example can benefit from a higher percentage of financial aid compared to another student not having such performance Some other schools consider the financial strength of the student or that of his/her parent when offering financial aids However a school like Columbia University mentioned earlier does not utilize such measure to determine who to give student loan and who not to give they give their students aids based on merit alone It translates to the fact that even Bill Gate's son can get student aid based on merit in this school There are several other schools in the same category some of such schools offering their students merit aid are Brown University Pomona College Amherst College Williams College Princeton University and Massachusetts Institute of Technology In calculating merit award the institutions concerned would consider the percentage discount off tuition Private colleges offer average tuition discount of 33.5% this means a student can end up paying only 19,650 if the actual tuition fee is 30,000 The cut represents 33.5% of the actual fee In public college on the other hand the student is given just 15% cut off the actual price When seeking for school financial aid the school can give the student verbal assurance but this is never enough The best guide a student can have regarding financial aids is the Common Data Set Each of the schools in the United States has a Common Data Set it is an amazing document more or less a treasure trove of statistics on the characteristics valued by the school in its application retention freshmen class profile and enrollment The document will equally show the number of students requiring financial aid from the institution concerned as well as the number of students that are given Furthermore the document reveals information about the percentage of student's needs the institution can meet how the awards are split between loans and grants as well as what average package is worth The student can easily search the major search engines for Common Data Set specific for any school The internet can reveal information about in-house scholarship and college aids for easy access Such information can equally reveal if a student is qualified for financial aid or not Some schools like Baylor University provide scholarship calculator on their website which helps the student check eligibility for any particular scholarship program related to the school Eligibility for any scholarship is usually determined by the class rank of the student as well as his/her ACT or SAT score
