

Geometry of Circles

Students who successfully complete this primer will be able to:

- Calculate the area and circumference of a circle.
- Apply the relationship between the radius of a circle and an arc length.

Radius, radians, and arc length

In many physics applications, it is necessary to convert between the distance from the center of a circle, the radius r , and the distance along the circumference, called the arc length s . These two parameters are related by the angle θ swept out from the starting point of the arc, typically defined as the x -axis, and the end point ([Figure 1](#)).

Scientists and mathematicians typically measure the angle θ in radians rather than degrees, which is defined as

$$\theta(\text{radians}) = \frac{s}{r} \rightarrow s = r\theta$$

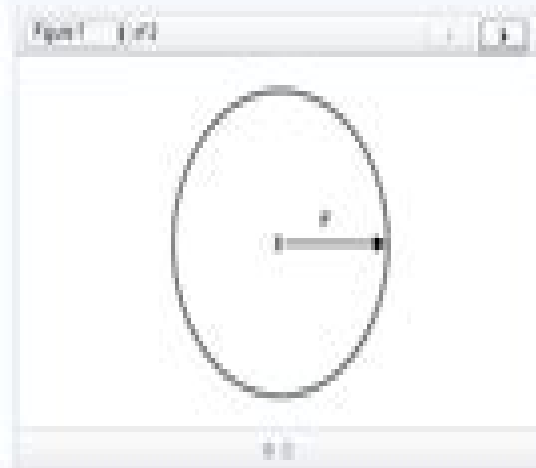

This second formula is another way to write the definition of circumference with s being an arc that comprises an entire circle and r being the radius of the circle. That means that 2π must be the angle of the entire circle:

$$\theta_{\text{full circle}} = 2\pi \text{ radians} = 360^\circ$$

In fact, the radius of a circle can be thought of as a conversion factor between the angular position θ and the arc length s :

$$1 \text{ radius} = 1 \text{ radius} \left(\frac{2\pi \text{ radians}}{1 \text{ full circle}} \right) = 2\pi \theta$$

[Click here](#) to watch a video that walks through the geometry of circles, including a worked-out example. Then answer the questions that follow.

Part C - Determining arc length

What is the length of an arc on a circle of radius 30.0 cm when $\theta = 60^\circ$?

Express your answer (in cm) to three significant figures.

[Hint](#)

s =cm

The Deep Learning Revolution Terrence J. Sejnowski,2018-10-23 How deep learning from Google Translate to driverless cars to personal cognitive assistants is changing our lives and transforming every sector of the economy The deep learning revolution has brought us driverless cars the greatly improved Google Translate fluent conversations with Siri and Alexa and enormous profits from automated trading on the New York Stock Exchange Deep learning networks can play poker better than professional poker players and defeat a world champion at Go In this book Terry Sejnowski explains how deep learning went from being an arcane academic field to a disruptive technology in the information economy Sejnowski played

an important role in the founding of deep learning as one of a small group of researchers in the 1980s who challenged the prevailing logic and symbol based version of AI The new version of AI Sejnowski and others developed which became deep learning is fueled instead by data Deep networks learn from data in the same way that babies experience the world starting with fresh eyes and gradually acquiring the skills needed to navigate novel environments Learning algorithms extract information from raw data information can be used to create knowledge knowledge underlies understanding understanding leads to wisdom Someday a driverless car will know the road better than you do and drive with more skill a deep learning network will diagnose your illness a personal cognitive assistant will augment your puny human brain It took nature many millions of years to evolve human intelligence AI is on a trajectory measured in decades Sejnowski prepares us for a deep learning future

Designing for Situated Knowledge Transformation Nina Bonderup Dohn, Stig Børsen Hansen, Jens Jørgen Hansen, 2019-11-27 How can knowledge developed in one context be put to use in other contexts How can students learn to do so How can educators design for learning this These are fundamental challenges to many forms of education The challenges are amplified in contemporary society where people traverse many different contexts and where contexts themselves are continuously changing Designing for Situated Knowledge Transformation provides a structured answer to these questions through an investigation of the theoretical empirical methodological and pedagogical design aspects which they involve Raising profound questions about the nature of knowledge of situativity and of transfer transformation and resituation it calls for and provides extended empirical studies of the forms of transformation that knowledge undergoes when people find themselves in new contexts while relying on existing knowledge Considering many avenues of practical application and insight Designing for Situated Knowledge Transformation develops a coherent framework for developing learning designs for knowledge transformation that is crucial in today's educational settings

(Peet) Schutte, 2012-12-14. How To Swindle by Faking Science: then you are going to read what is the mother of all the conspiracies in science, which is about how science applies mind control by processing thought control. This is the truth. Science practicing physics about Astronomy, Cosmology, and everything to do with Stars, the Cosmos, or Universe. Galactica is under a Conspiracy to hide and conceal the truth. Does this sound far fetched? I challenge you to read this book and then still think it is far fetched. Read what science hides and I prove every word. This book reveals what Science in Physics concerning Astronomy, Cosmology hides for hundreds of years. You read how science swindles to make Newton seem truthful and every time they find out how nature works, nature destroys Newtonian concepts completely. This is the a conspiracy. For the first time in history I prove gravity is P. But if science was as unblemished and perfect as physicists say it is, then my work has no place to be. This then is the attitude in science about my work. To counter that claim I prove that there is a mother conspiracy in place about covering the misconceptions hidden under a cloak of false lily white purity and truthfulness. To hide Newton's indefensible incorrectness, science created a mother conspiracy which I reveal. There is a mother conspiracy hiding mistakes in place. Science benefits from and builds upon this mother conspiracy being in place while I can't get further with my work while it is in place. It's imbedded in the teaching and learning process; students undergo in learning Newtonian dogma. Students are brainwashed by the instigation of mind control that forces students to accept the dogma. I prove gravity has value of P, still by keeping me quiet. I am perverted to introduce a new cosmic vision showing how the Universe forms when enlisting the four phenomena. How it works in science is Newton gets undeserved, unduly credit in discrediting nature. I show how singularity takes on every shape and space we know. Are you up to facing the truth about what you thought is more righteous than God? Read this and see what those in
