## **Military Skills Development Programme 2015 2016:**

South Africa's Post-Apartheid Military Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil military relations of countries around the world.

*Annual Report South Africa*. Department of Defence, 2016 *Contemporary Military Reserves* Eyal Ben-Ari, Vincent Connelly, 2022-12-30 This book offers a comparative study of military reserves in contemporary democracies. A combination of budgetary pressures, new missions and emerging military roles during the past three decades has led the armed forces of democracies to rethink the training and use of reserve forces. Moreover, reservists have become central to the armed forces as part of moves towards total or comprehensive defence. Despite this, a scholarly bias towards studying regulars and conscripts means that reservists and reserve soldiers continue to receive only marginal attention. This volume fills that lacuna through a series of country studies examining how best to understand the peculiarities of reservist service. In contrast to regulars and conscripts

reservists are marked by their dual management of civilian and military careers different family dynamics diverse motivations and commitment to the armed forces the material and non material incentives they are offered and their place in the political sphere This volume suggests two frames to make sense of such differences first it looks at reservists as transmigrants traveling between the military and civilian worlds and second it analyzes the multiple informal contracts and negotiations that bind them to the military All the chapters adopt these conceptualizations granting the volume a common focus and integrative frame The volume will be of much interest to students of military and strategic studies civil military relations sociology and International Relations *Cultural Heritage in Modern Conflict* Timothy Clack, Mark Dunkley, 2022-09-09 This edited volume offers an in depth study of heritage and warfare from the perspective of defence studies The book focuses on how in different contexts heritage can be a catalyst and target of conflict an obstacle to stabilisation and a driver of peace building It documents the changing role of heritage in terms of both exploitation and protection in various military capabilities theatres and operations With particular concern for the areas of subthreshold and hybrid warfare stabilisation cultural relationships human security and disaster response the volume reviews the historical relationship between heritage and armed conflict including the roles of embedded archaeologists safeguarding of ethics and dislodgement and destruction of material culture Various chapters in the book also demonstrate the value of understanding how state and non state actors exploit cultural heritage across different defence postures and within both subthreshold and proxy warfare in order to achieve military political economic and diplomatic advantages This book will be of interest to students of defence studies heritage studies anthropology and security studies in general as well as military practitioners
