Clinical Management of the Rheumatoid Hand, Wrist, and Elbow Kevin C. Chung, 2016-03-17 This book provides comprehensive coverage of the management and related surgery of the rheumatoid hand wrist and elbow It provides a much needed authoritative discussion of the epidemiology surgical techniques and outcomes of rheumatoid surgery The book begins by introducing important background concepts and then goes on to present up to date details on pre and postoperative management indications and treatment options Each section ends with case based coverage of common clinical scenarios and features numerous illustrations that showcase the sequential approach in managing this disease Clinical Management of the Rheumatoid Hand Wrist and Elbow has broad appeal for rheumatologists and primary care physicians and will assist them in providing appropriate referrals for surgery consultations It also serves as a valuable reference for surgeons treating and managing patients with this unique disease

Bridging the Gap Between Policy and Science in Assessing the Health Status of Marine Ecosystems, 2nd Edition Angel Borja, Michael Elliott, María C. Uyarra, Jacob Carstensen, Marianna Mea, 2017-03-22 Marine management requires approaches which bring together the best research from the natural and social sciences It requires stakeholders to be well informed by science and to work across administrative and geographical boundaries a feature especially important in the inter connected marine environment Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services Once those marine ecosystem services have been created they deliver societal goods as long as society inputs its skills time money and energy to gather those benefits However if societal goods and benefits are to be limitless society requires appropriate administrative legal and management mechanisms to ensure that the use of such benefits do not impact on environmental quality but instead support its sustainable use

Handbook of Human and Planetary Health Walter Leal Filho, 2022-09-06 This book contains a set of papers which explore the subject matter of human and planetary health at various angles The year 2015 was a special year in the field of human and planetary health In that year the report produced by the Rockefeller Foundation and the journal The Lancet called Safeguarding human health in the Anthropocene epoch report of The Rockefeller Foundation Lancet Commission on planetary health was launched Also in 2015 the World Health Organization and the Secretariat of the Convention on Biological Diversity published the report Connecting global priorities biodiversity and human health a state of knowledge review with over 100 contributors meant to guide future joint actions Both documents comprehensively address the need for a better understanding of the connections between human health and ecosystems and the risks associated with damages to the integrity of the planet The period in which humanity finds itself right now the Anthropocene is a risk one since mankind is putting the planet under considerable pressure These elements have led to the emergence of a new field of research namely planetary health Planetary health seeks to address a very concrete and urgent contemporary problem namely the need to understand quantify and act in order to reverse the

effects of human population growth and the acceleration of socioeconomic activities on the environment and inter alia the disturbances in the Earth's natural ecosystems and how these in turn impact human health and well being Anthropogenic disturbances in natural ecosystems are characterized by changes in climate land use changes in the nitrogen and phosphorus cycle chemical pollution of soil water and air reduction in the availability of drinking water loss of biodiversity destruction of the ozone layer and ocean acidification among others In all these areas there is a perceived need to document and promote examples of initiatives and good practice which may change current trends This book addresses this need It documents experiences case studies and projects which explore the connections between human and planetary health and illustrates examples which show the consequences of ecosystemic disturbances to the health and well being of humanity with the emergence of new diseases worsening of infectious diseases and increase in chronic non communicable diseases related to the deterioration of the current food system hyper urbanization microbial resistance climate led migration and zoonoses among others Planetary health is a new effort to deal with the question of sustainability and human life on the planet under an increasingly integrative transdisciplinary and global perspective since the problems of this planetary crisis cross geopolitical borders and academic boundaries and affect humanity as a whole This book provides a contribution to this emerging field Thanks to its design and the contributions by experts from various areas it provides a welcome contribution to the literature on planetary health and it inspires further works in this field
