Topic: Family, Life & Experiences | Words: 3422 | Pages: 14

## Introduction

Learning is essential to individuals' personal and professional growth, and various academic theories have distinct approaches to this subject. Experiential learning, known as Kolb's reflective cycle, is one framework that emphasizes empirical evidence as the primary learning instrument. Based on substantial experience, Kolb's reflective cycle introduces three additional stages of learning - thoughtful observation, abstract conceptualization, and active experimentation (Nagle and Tzoc, 2022). These three concepts are essential in experiential learning, laying the groundwork for reflective analysis. They help learners better understand themselves through a lens of personal experiences. Ultimately, the current reflective report summarizes my personal and professional development based on Kolb's reflective cycle.

## Relationship with Yourself

In this section, I aim to highlight experiences of my personal and professional journey, analyzing my self-awareness and emotional intelligence. Moreover, I want to reflect on the relatively recent events since I am currently in the most challenging period of my life. I am thirty-three years old and a single mother trying to raise my five-year-old daughter properly. While I was initially optimistic about building a family, recent events have taken a physical and mental toll on me. My mother used to help me with household matters, such as babysitting for my daughter and assisting me with housework. However, she has recently collapsed with various illnesses, primarily affected by heart problems
