Lufthansa Junkers Ju 5:

Lufthansa Junkers Ju 52 Peter Pletschacher, 1998 Airlines of the Jet Age R.E.G. Davies, 2016-08-24 Airlines of the Jet Age provides the first comprehensive history of the world's airlines from the early 1960s to the present day. It begins with an informative introductory chapter on the infancy of flight and the development of air transport craft used during the First and Second World Wars and then wings into the first Jet Age the advent of jet airlines. It continues through the second Jet Age of wide bodied aircraft such as the Boeing 747 and DC 10 and closes with the introduction of the third Jet Age which begins with the giant double decked Airbus A380. This reference book is an unparalleled reference for aviation buffs covering airlines around the globe and throughout the modern eras of human flight. The last book written by renowned airline historian R E G Davies *Airlines of the Jet Age* is the ultimate resource for information and insight on modern air transport.

Aircraft of the Luftwaffe, 1935-1945 Jean-Denis G.G. Lepage, 2009-03-23 One of the most significant innovations in modern warfare has been the appearance and development of air power a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945 with descriptions and illustrations of almost all of the Luftwaffe's airplanes including fighters jet fighters dive bombers ground attackers medium and heavy bombers jet bombers seaplanes flying boats and carrier planes transport and gliders reconnaissance and training aircrafts helicopters and many futuristic projects and other rarities. **Stalingrad Airlift 1942-43** William E. Hiestand, 2023-01-19 The story of what really led to Germany losing the battle of Stalingrad the inability of the Luftwaffe to keep Sixth Army supplied throughout the winter of 1942-43 and why this crucial airlift failed. Luftwaffe chief Hermann Goering's failure to deliver his promise to keep Sixth Army supplied at Stalingrad was one of the most hard hitting strategic air failures of World War II. 300 tons a day of supplies were required to sustain the Sixth Army flown in against a Soviet fighter force whose capabilities were rapidly being transformed. The Luftwaffe's failure left Sixth Army trapped vulnerable and too weak to attempt a breakout. The destruction of Sixth Army was one of the major turning points in World War II but the Luftwaffe's crucial role in this disaster has often been overlooked. Some claim the attempt was doomed from the beginning but in this intriguing book author William E Hiestand explains how the Germans had amassed sufficient aircraft to at least theoretically provide the supplies needed. Demands of aircraft maintenance awful weather and in particular the Soviet air blockade crippled the airlift operation. In addition the employment of increasing numbers of modern aircraft by the Soviet Air Force using more flexible tactics coupled with Chief Marshal Novikov's superior Air Army organisation proved decisive. The Luftwaffe did eventually recover and mounted focused operations for control of limited areas of the Eastern Front but overall it had lost its dominance. Packed with strategic diagrams and maps archive photos and artwork of aerial battles over Stalingrad and including bird's eye views of Operation Winter Storm and airlift operations and tactics this title clearly demonstrates how the Luftwaffe lost its strategic
