Mathematics Teaching and Professional Learning in sub-Sahara Africa Kakoma Luneta, 2021-12-09 The book represents a crop of wide ranging research conducted by renowned scholars in sub-Saharan Africa revolving around mathematics teaching and professional development programs for mathematics teachers. The research-based proposals and actual how to conduct professional development initiatives that enhance effective mathematics instruction are rooted in teacher input and informed by learners' errors and misconceptions. The book provides a comprehensive snapshot on mathematics teaching, learning and effective professional development programmes for mathematics teachers in sub-Saharan Africa. It is the only research output that advances and disseminates issues of mathematics education and research in the region with input from South Africa, Kenya, Rwanda, Uganda, Malawi, Namibia, Lesotho, Ethiopia and Zimbabwe. *Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East* Cynthia S Sunal, Oluseyi Matthew Odebiyi, Kagendo Mutua, 2022-06-01 As the demand for education at all levels has increased, so have the models of meeting these increased demands for education. As in many other parts of the world, public education has expanded to serve large populations across the regions of Africa, the Caribbean and the Middle East. Many nations in these regions have instituted mandates, policies and frameworks intended to simultaneously increase access to public education opportunities as well as improve the quality of education provided and to address a wide populace. Because the increase in educational demand has occurred at all levels, these efforts often address various levels of education from early childhood through primary schooling, junior secondary and secondary schooling and into tertiary education. Efforts also have been made to increase participation in education by marginalized and/or special populations. The range of efforts is large with some focusing on involving migrants, immigrants, refugees in primary education while others aim at opening up choices at the university level. Recently, nations in the region have recognized the possibilities of digital learning. Online learning as cell phones and other widely used portable wireless devices have made it possible to sell the idea that one can learn from anywhere at any time. This widespread access to technology has made it possible for governments as well as private entities to expand learning opportunities even to populations previously unreachable or to address difficult-to-reach sectors of the population. At the same time, the population itself has not only increased in numbers but in diversity. Maintaining quality through digital and other means of quick expansion of educational opportunities continues to be challenging if not problematic. *Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean and the Middle East* is Book IX of the series *Research on Education in Africa, the Caribbean and the Middle East*. Chapters document, describe and/or raise critical issues and/or questions resulting from government policies, mandates and frameworks intended to make available public education to an ever-growing populace while at the same time being mindful of improving quality of education being available to an increasingly diverse populace. **Annual Report Mpumalanga (South Africa).** Department of
