

# The Immune and Lymphatic System

## Antibodies

The body needs help fighting microbes and the toxins they produce. On the surface of microbes are antigens. The antibodies can recognize toxic or foreign antigens, and when they do, the microbe is marked for destruction. Cells, proteins, and other chemicals rush to the marked microbe and attack!

## Bone Marrow

Inside your bones is a spongy tissue called bone marrow. It makes red blood cells that help the body carry oxygen, white blood cells to help fight off infections, and platelets that help the blood clot.

## Thymus

The blood in your body is monitored and filtered by the thymus. But that isn't all the thymus does – it also produces a special type of white blood cell called T-lymphocytes.

## Spleen

The spleen helps to remove microbes by filtering the blood. It destroys old or damaged red blood cells. Most importantly, it makes antibodies and lymphocytes to support our immune system fight off any microbe invaders.

## Complement System

The complement system is a big word for the proteins that rush to help the antibodies attack marked microbes.

## Lymphatic System

Inside your body is a network of delicate tubes. These tubes make up the lymphatic system and are part of the immune system. These tubes carry a colorless liquid called lymph. The lymphatic system is made up of:

- Lymph nodes – trap microbes and clean lymph
- Lymph vessels – tubes that carry lymph
- Lymphocytes – white blood cells

## **Lymphatic System And Immunity Study Guide:**

Lymphatic System (Speedy Study Guides) Speedy Publishing, 2014-06-21 The lymphatic system is one of the more complex systems of the body. It is responsible for keeping a person's fluids balanced and putting fluids into the blood. It is also responsible for making leukocytes and antibodies to help fight infection and disease. A chart of how the lymphatic system works would show you all the capillaries, vessels, and nodes that make up the system. Some charts will even show you in detail how things flow in and out of each node and filter out through the body. **Study Guide to Accompany Anatomy and Physiology**

Student Notebook and Study Guide to Accompany The Human Body

Bruce Wingerd, Patty Bostwick Taylor, 2013-02-01 This Student Notebook and Study Guide is the ideal companion to Bruce Wingerd's The Human Body. It reinvents the traditional study guide by giving students a tool to help grasp information in class and reinforce learning outside of class. Too often, students struggle to both learn the concepts presented and simultaneously record crucial information. The Student Notebook and Study Guide provides a structure for recording in-class material that

parallels the text's concept presentation and includes supplemental questions and activities for assignment outside of the classroom. A complete answer guide for both the in-class and out-of-class materials is available online.
