Knowledge Readings In Contemporary Epistemology By Sven Bernecker:

Reading Epistemology Sven Bernecker, 2006-01-30 Designed for readers who have had little or no exposure to contemporary theory of knowledge *Reading Epistemology* brings together twelve important and influential writings on the subject Presents twelve influential pieces of writing representing two contrasting views on each of six core topics in epistemology Each chapter contains an introduction to the topic introductions to the authors extensive commentaries on the texts questions for debate and an annotated bibliography Includes writings from Robert Nozick Ernest Sosa Laurence Bonjour and Fred Dretske Encourages readers to engage with the texts and to think for themselves Knowledge Sven Bernecker, Fred Dretske, 2004 The Bounds of Freedom: Kant's Causal Theory of Action Robert Greenberg, 2016-09-26 This monograph is a new interpretation of Kant's temporal conception of the causality of the freedom of the will The interpretation is based on an analysis of Kant's primary conception of an action viz as a causal consequence of the will The analysis in turn is based on H P Grice's causal theory of perception and on P F Strawson's modification of the theory The monograph rejects the customary assumption that Kant's maxim of an action is a causal determination of the action It assumes instead that the maxim is definitive of the action and since its main thesis is that an action for Kant is to be primarily understood as an effect of the will it concludes that the maxim of an action can only be its logical determination Kant's temporal conception of the causality of free will is confronted not only by contemporary philosophical conceptions of causality but by Kant's own complementary theory of causality in the Second Analogy of Experience According to this latter conception causality is a natural relation among physical and psychological objects and is therefore a temporal relation among them Faced with this conflict Kant scholars like Allen W Wood either reject Kant's temporal conception of causality or like Henry E Allison accept it but only in an anodyne form Both camps however make the aforementioned assumption that Kant's maxim of an action is a causal determination of the action The monograph rejecting the assumption belongs to neither camp First Philosophy II: Knowledge and Reality - Second Edition Andrew Bailey, 2011-07-08 *First Philosophy Knowledge and Reality* brings together classic and ground breaking readings on epistemology and the philosophy of science Andrew Bailey's highly regarded introductory anthology has been revised and updated in this new edition The comprehensive introductory material for each chapter and selection remains and new sections on philosophical puzzles and paradoxes and philosophical terminology have been added New readings include Edmund Gettier on justified true belief Wesley Salmon on induction and Helen Longino on feminist science **Empiricism and Experience** Anil Gupta, 2006-08-31 This book offers a novel account of the relationship of experience to knowledge The account builds on the intuitive idea that our ordinary perceptual judgments are not autonomous that an interdependence obtains between our view of the world and our perceptual judgments Anil Gupta shows in this important study that this interdependence is the key to a satisfactory account of experience He uses tools from logic and the philosophy of language to argue that his account of experience makes

available an attractive and feasible empiricism **First Philosophy: Knowing and Being - Second Edition** Andrew Bailey, 2013-06-17 First Philosophy Knowing and Being brings together over thirty classic and contemporary readings in epistemology and metaphysics Mindful of the intrinsic difficulty of the material the editors provide comprehensive introductions both to each topic and to each individual selection By presenting a detailed discussion of the historical and intellectual background to each piece the editors enable readers to approach the material without unnecessary barriers to understanding A brief introduction to arguments is included as are appendices on terminology and philosophical puzzles and paradoxes **Comparative Philosophy and J.L. Martin, 2010-06 What is knowledge How
