Maquiladora Supplier Handbook, 1997

Management Information Systems James A. O'Brien, George Marakas, 2006

This new Seventh Edition is designed for business students who are or who will soon become business professionals in the fast changing business world of today. The goal of this text is to help business students learn how to use and manage information technologies to revitalize business processes, improve business decision making and gain competitive advantage. Thus it places a major emphasis on up to date coverage of the essential role of Internet technologies in providing a platform for business commerce and collaboration processes among all business stakeholders in today's networked enterprises and global markets. The benchmark text for the syllabus organized by technology, this text approaches the material from a managerial perspective. O'Brien defines technology and then explains how companies use the technology to improve performance. Real world cases finalize and enhance the explanation.

Neoliberalizing Spaces in the Philippines Arnisson Andre Ortega, 2016-09-09. Amidst the recent global financial crisis and housing busts in various countries, the Philippines' booming housing industry has been heralded as Southeast Asia's hottest real estate hub and the saving grace of a supposedly resilient Philippine economy. This growth has been fueled by demand from balikbayan returnee Overseas Filipinos and has facilitated the rise of gated suburban communities in Manila's sprawling peri urban fringe. But as the Filipino dreams of successful balikbayans are built inside these new gated residential developments, the lives of marginalized populations living in these spaces have been upended and thrown into turmoil as they face threats of expulsion. Based on almost four years of research, this book examines the tumultuous geographies of neoliberalization that link suburbanization, transnational mobilities and accumulation by dispossession. Through an accounting of real estate and new suburban landscapes, it tells of a Filipino transnationalism that engenders a market based and privatized suburban political economy that reworks socio spatial relations and class dynamics. In presenting the literal and discursive transformations of spaces in Manila's peri urban fringe, the book details life inside new gated suburban communities and discusses the everyday geographies of privileged new property owners, mainly comprised of balikbayan families, and exposes the contradictions of gated suburban life from resistance to Home Owner Association rules to alienating feelings of loss. It also reveals the darker side of the property boom by mapping the volatile spaces of the Philippines' surplus populations, comprised of the landless farmers, informal settler residents and indigenous peoples. To make way for gated communities and other profitable developments in the peri urban region, marginalized residents are systematically dispossessed and displaced while concomitantly offered relocation to isolated socialized housing projects, the last frontier for real estate accumulation. These compelling accounts illustrate how the territorial embeddedness of neoliberalization in the Philippines entails the consolidation of capital by political economic elites and privatization of residential space for an idealized transnational property clientele. More than ever, as the Philippines is being reshaped by diaspora and accumulation by dispossession, the contemporary moment is a critical time to reflect on.
