Cardiac Nursing Erika S. Sivarajan Froelicher,2000 A classic in the field of cardiac nursing this well recognized text and clinical reference has earned the reputation as The Red Reference Book for nurses caring for patients who have cardiac disease Revised and updated this edition reflects the latest procedures and techniques in cardiac nursing This book incorporates the nursing process and critical thinking strategies while also providing a foundation for the contents based on theory anatomy and physiology The liberal use of figures tables and authoritative references makes this the ideal text for graduate students and a reference for any nurse interested in cardiac nursing The authors of Cardiac Nursing Fourth Edition lay the groundwork for cardiovascular nursing in Part I by presenting the necessary information about cardiovascular anatomy and physiology Before the reader can fully comprehend the details of coronary heart disease it is essential to assimilate the information found in Part II Physiologic and Pathophysiologic Response Part III covers the assessment of coronary heart disease and addresses many noninvasive and invasive testing procedures currently available In Part IV various disease states and treatments are fully explored Finally Part V provides valuable information regarding the latest concepts in health promotion and disease prevention The straightforward style makes this an easily comprehensible text for both the experienced and novice nurse caring for patients who have or are at risk for developing cardiac disease A Brandon Hill Recommended Title

Healthcare Concepts for Women in India. Problems of the System and Ways to Solve Them Navrup Kaur,2021-08-12 Academic Paper from the year 2021 in the subject Health Health system grade 1 0 University of Applied Sciences L beck language English abstract This paper focusses on the issue of cultural misogyny and how this effects the health of women in India It mainly analyses the structural and cultural problems that directly affect the women s health Therefore the second chapter outlines the most important facts and figures

of the sub continent In the third chapter the structure of the health system is discussed in further precision The National Health Plan NHP is examined in more detail and the structure and role of the healthcare centers is explained The chapter ends with information about the National Rural Health Mission NRHM that was created to accompany the National Health Plan which therefore focuses more intensively on the conditions of rural areas In more bucolic regions and hard to reach places the access to medicine is difficult Women and girls in particular are dependent on male members of the family as they are usually never educated or do not have the opportunity and permission to travel alone These problems and many others that women have to endure are addressed in the following chapter Women are immensely disadvantaged because of their gender This relates both to the cultural aspect and the role of women and runs through the health sector Hygiene violence and pregnancy are dangerous factors for Indian women due to lack of education and the patriarchal society In this regard both some state programs and private organizations have been trying to educate and support women in their position For this purpose numerous concepts have been developed to support women in the respective problem areas Concepts which go beyond the health related are to enlighten women and to help to overcome misogyny in this area retroactively and future oriented The concepts are evaluated in the last chapter with regard to their effect achievement of objectives and acceptance It will be attempted to clarify whether the individual concepts are useful and to what extent they could perhaps even be improved
