

HAYBOB 300 and 360

NEW HAYBOB TEDDER / RAKE COMBINATION

The HAYBOB 300 and 360 tedder/rake combination are universal haymakers, ideally suited for the farm hobbyist, as well as hay producers with small to medium-sized operations. The HAYBOB models offer excellent performance in grass and delicate legume hay crops, and provide thorough tedding to uniformly spread wet crops for fast drying. Easily converted from tedding to raking, these machines also provide gentle crop handling and fully, well formed windrows. The HAYBOB combination tedder/rakes offer a practical and economical alternative for producers who wish to save the cost of multiple specialized machines.

HAYBOB 360

The position of the left rear axle on the HAYBOB 360 is easily reversed with a shift lever for simple conversion between raking and tedding. The side-delivery design provides uniform windrows and the ability to merge windrows in two passes.

CENTRIFUGAL FORCE-CONTROLLED TINES

Benefits you expect from Kuhn

- Heavy, individually-mounted, pivoting tines have roller bearings that provide reliable performance and operation that is practically maintenance free.
- Tine height and side-pick angle are quickly optimized for both tedding and raking by adjusting wheel columns and the tractor's top link to obtain the desired setting.
- Each side header is equipped with both corner and side tines to obtain a wide working area for high-capacity operation and faster working speeds.
- A central swath divider ensures that crop is evenly distributed between the rows when tedding to provide the most uniform distribution of crop for rapid drying.

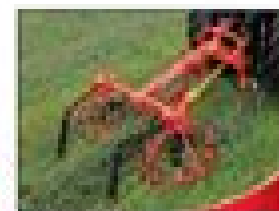

Centrifugal Force-Controlled Tines

The centrifugal force-controlled, horizontal tines will adjust to hold centers as they pass through stubble to cleanly pick up crop, providing faster working speeds with little risk of contamination when tedding and raking.

Pivoting Headstock with Lock

The pivoting headstock enables wheels of work to closely follow the path of the tractor when turning, without damage to the windrow. When used for transport, the headstock automatically centers and locks for added safety.

HAYBOB 300

The HAYBOB 300 provides efficient tedding and quality center-delivery raking. Adjustable swath boards provide neatly formed windrows and may be offset to form a double row in three passes.

Grass Harvesting at its Best!
