*The Engaged Health Sciences Library Liaison* Lindsay Alcock, Kelly Thormodson, 2020-05-15 Selected as a 2025 Doody's Core Title. Liaison roles are generally commonplace in medical and health sciences libraries as librarians strive to develop and enhance relationships and collaborations with clinicians and faculty. While the liaison of the past acted primarily as the main contact between respective departments and the library providing a facilitative function (e.g., arranging for instruction sessions, inviting feedback on the collection, providing updates on new programs and services, etc.), today's liaison activities are more proactive and robust. The Engaged Health Sciences Library Liaison features ten program descriptions that illustrate how the reach and scope of librarians in the medical healthcare arena has changed dramatically since the inception of liaison services. The program outcomes described illustrate a direct impact on curriculum development, address new information types with new access and preservation technologies, expand stakeholder groups, create research and teaching collaborations, and enhance functional roles. This authoritative book, copublished by the Medical Library Association, demonstrates that collaboration and communication, the basic tenets of a liaison program, breed innovative programs and services that are relevant, current, and valuable.

*Regression Analysis* Jeremy Arkes, 2023-01-19 This thoroughly practical and engaging textbook is designed to equip students with the skills needed to undertake sound regression analysis without requiring high-level math. Regression Analysis covers the concepts needed to design optimal regression models and to properly interpret regressions. It details the most common pitfalls, including three sources of bias not covered in other textbooks. Rather than focusing on equations and proofs, the book develops an understanding of these biases visually and with examples of situations in which such biases could arise. In addition, it describes how holding other factors constant actually works and when it does not work. This second edition features a new chapter on integrity and ethics and has been updated throughout to include more

international examples Each chapter offers examples exercises and clear summaries all of which are designed to support student learning to help towards producing responsible research This is the textbook the author wishes he had learned from as it would have helped him avoid many research mistakes he made in his career It is ideal for anyone learning quantitative methods in the social sciences business medicine and data analytics It will also appeal to researchers and academics looking to better understand regressions Additional digital supplements are available at [www.youtube.com/channel/UCenm3BWqQyXA2JRKB\\_QXGyw](http://www.youtube.com/channel/UCenm3BWqQyXA2JRKB_QXGyw)

Reddy, Bonnie TuSmith, 2002 Winner of the 2003 American Educational Studies Association Critics Choice Awards Winner of the 2003 Gustavus Myers Outstanding Book Award Did affirmative action programs solve the problem of race on American college campuses as several recent books would have us believe If so why does talking about race in anything more than a superficial way make so many students uncomfortable Written by college instructors from many disciplines this volume of essays takes a bold first step toward a nationwide conversation Each of the twenty nine contributors addresses one central question what are the challenges facing a college professor who believes that teaching responsibly requires an honest and searching examination of race Professors from the humanities social sciences sciences and education consider topics such as how the classroom environment is structured by race the temptation to retreat from challenging students when faced with possible reprisals in the form of complaints or negative evaluations the implications of using standardized evaluations in faculty tenure and promotion when the course subject is intimately connected with race and the varying ways in which white faculty and faculty of color are impacted by teaching about race
